PURCHASING TIPS

Here are some professional tips that we use when implementing a design to completion:

- Measure first!
- The email will take you to the cart that holds item in the design. From there you can go to a webpage for each item and see its dimensions, more images and details about it. Take all info into consideration before ordering to ensure approval of cart.
- Use the layout as a guide for spacing your furniture.
- You are able to control what and when you purchase. You can edit your cart as needed and purchase on your own timeline.
- Consider opting for white glove delivery for the larger furniture items or items required assembly, at least. This makes the installation process much smoother. Items arrive at different times and sometimes need assembly, and having it placed in your space eliminates the need to constantly move furniture yourself.
- In the event of an item being backordered, and you do not wish to wait, you may request to be sent a personalized professional re-selection to replace the item.
- Review the return policy for each item to ensure you agree to the conditions.
- If you are feeling stuck at any moment, you can reach out to us for a consultation to get you through it.
